Education

Regent Education & Research Foundation

B.Tech, Computer Science Engineering **CGPA: 8.2/10**

Courses: Data Structures & Algorithms, DBMS, OOP, Operating Systems, SDLC

West Bengal, India

2022 – 2026

CM Science College, Darbhanga

Higher Secondary Examination (Science – PCM) **78.4%**

Darbhanga, Bihar

2019 – 2021

Profile Summary

Full Stack Web Developer with hands on experience building responsive and user friendly web applications using the **MERN stack**. Proficient in React.js, Node.js, and database integration with strong fundamentals in data structures and algorithms – demonstrated by solving **200+ problems on LeetCode**. Quick learner with a track record of delivering complete project lifecycles from design to deployment. Proven ability to lead under pressure – **won Inter College Hackathon 2025** competing against 20+ teams.

Experience

Lamda Infotech Pvt. Ltd.

Remote

Software Developer Intern

Dec 2025 – Feb 2026

- Built **responsive web pages and forms** for student admission, school information, and document submission workflows, improving end-to-end usability for administrative staff.
- Executed **SQL database operations** to store, retrieve, and manage admission-related data efficiently; designed schema to support multi-step document collection flows.
- Applied **form validation, error handling, and navigation improvements** to enhance overall application reliability and reduce user-facing errors across critical submission flows.
- Collaborated with senior developers in **code reviews and sprint planning**, gaining exposure to Agile workflows and delivering features within tight deadlines.

Projects

PixelVault — Responsive Image Gallery Platform with Auth & One Click Download

React.js, Tailwind CSS, Aceternity UI, Firebase Authentication, Unsplash API

- Built a **fully responsive image gallery platform** consuming the **Unsplash API** to surface curated high resolution photos across categories; users can navigate collections, search by keyword, and **download full quality images** in one click.
- Integrated **Firebase Authentication** (Google OAuth + Email/Password) with protected routes; only authenticated users can access download functionality – enforced via Firebase Auth state listeners and React context.
- Leveraged **Aceternity UI** animated components (spotlight cards, shimmer loaders, hover effects) for a polished modern UX; built with **Tailwind CSS** ensuring seamless responsiveness across mobile, tablet, and desktop viewports.
- Applied **infinite scroll pagination** with the Unsplash API to load images progressively, reducing initial load time and improving perceived performance significantly.

Job Portal — Full Stack Job Discovery & Application Platform

React.js, Node.js, Express.js, MongoDB, Tailwind CSS, REST APIs, JWT

- Expanded a **full-stack MERN Job Portal** enabling employers to post and manage listings and candidates to search, filter, and apply – covering the complete hiring workflow end-to-end.
- Built **responsive UI** using React.js and Tailwind CSS for job listings and application forms; enforced **RESTful APIs** with Node.js and Express.js for job management and JWT-based user authentication.
- Integrated **MongoDB** for efficient storage of job postings, user profiles, and application data; enforced role-based access control separating employer and candidate views.
- Executed **search and filter functionality** by job title, location, and category with debounced input and reducing unnecessary API calls.

Blog Application — Full-Stack Content Management Platform with Auth

React.js, Node.js, Express.js, MongoDB, JWT, REST APIs

- Improved a **full-stack blog platform** supporting create, edit, and delete of blog posts with complete **JWT based user authentication** (Register, Login, Logout) via Node.js and Express.js.
- Built a **responsive React.js UI** integrated with MongoDB; executed **CRUD operations, post management, and secure API handling** with proper error handling, input sanitization, and scalable route/middleware architecture.

Technical Skills

Languages: JavaScript, Java (DSA)

Frontend: React.js, HTML5, CSS3, Tailwind CSS, Aceternity UI

Backend: Node.js, Express.js, REST APIs

Database & Auth: MongoDB, MySQL, SQL, Firebase Authentication

Core Concepts: Data Structures & Algorithms, DBMS, OOP, Operating Systems, SDLC

Tools & Technologies: Git, GitHub, Postman

Achievements & Activities

- Inter College Hackathon 2025 – Winner:** Led a team to first place among 20+ competing teams; designed and shipped a working full stack prototype within a 24 hour build window.
- LeetCode – 200+ Problems Solved:** Consistently practices DSA with focus on arrays, strings, trees, and dynamic programming; maintains an active problem-solving streak.
- Microsoft Certification:** Completed *Introduction to Prompt Engineering with GitHub Copilot*, demonstrating initiative in learning modern AI-assisted development workflows.
